Lounge in Twilight

Lounge Reclined in Twilight

Golden makes life luxuriously easy. No matter what position our power lift recliner is in, you can be standing easily with the touch of a button. Answer the door, check an item on the stove, or stand to greet your loved one. A gentle lift is provided by the seat back automatically opening so you don't experience a pushing motion. You don't have to activate your leg muscles until you're ready to exit.

The **TV watching position** offers the most comfortable, neutral posture for upright relaxation. A body in this position is recharged with ergonomic upper body support and comfort. You can rest your feet out in front and bend your knees while relaxing your back muscles with no stress on the lumbar region. Our chairs have a unique, active shear-reducing seat box with four-way motion (up, down, forward and back) eliminating pressure on the back.

The **TV in Twilight** position is an enhanced TV watching position using our patented Twilight Technology, which allows an additional motor to provide a unique tilting motion - a whole new angle that offers a cradle-like feeling so you can rejuvenate and refresh your lower extremities. Only Golden's Twilight Technology allows your feet to be elevated above the heart while still in a position to enjoy your favorite show on TV. *Available on PR514 only.*

The **Lounge in Twilight** position allows you to be actively engaged in the living room while enjoying perfect comfort when talking with family and friends or watching TV. Using our patented Twilight Technology, our third motor provides a unique tilting motion while keeping you in more of an upright position. A gentle bend in the knee reduces stress on the lumbar area. *Available on PR514 & PR405 only.*

The **Lounge Reclined in Twilight** position is the ultimate choice for relaxation. The third motor in our patented Twilight Technology has the ability to achieve a series of 30 degree angles to relax the lower extremities while the unique tilt provides a comfortable upright position. It eliminates horizontal stress on the body and allows you to have restful sleep with no pressure on the joints. *Available on PR514 only.*

A MESSAGE FROM OUR OWNER AND CEO

Golden is known for comfort, quality, and innovation. Since 1985, we have produced power lift recliners that push the boundaries of expectation, providing seating options with unique body positions. In 2018, we launched the MaxiComfort Cloud with Twilight cradle technology, a luxury power recliner capable of providing never before seen or felt levels of comfort, thanks to our patented, three-motor mechanism.

There is truly nothing else like our Twilight technology on the market. It didn't exist - until now. It offers you a new range of rejuvenating positions to comfort the body and ease the spirit. Achieve an extreme Zero Gravity position and discover new angles with tilting motion for TV watching and lounging at the touch of a button.

These chairs are built by Americans, handcrafted with the highest quality components available, engineered to give you maximum service with minimum maintenance, and backed by not only a lifetime warranty our lift and scissor mechanism, but our wooden frame as well. We hope your Golden chair provides years of comfort and enjoyment while sitting down and relaxing as well as standing up when lift assist is needed most.*

We are proud to manufacture America's favorite power lift recliners - for your family, and ours.

Richard Golden,
Chief Executive Officer

* With domestic and imported materials.

Zero Gravity

Rejuvenate

Trendelenburg / Lay Flat

The **Zero Gravity** position mimics the position of astronauts during launch and eliminates pressure by distributing your body's natural weight. This position supports all parts of the body equally so you can physically decompress after a long day by gliding into stress-free comfort and experience a natural relaxation with minimum muscle tension.

The **Rejuvenate** position is an extreme Zero Gravity position that only our patented Twilight Technology can provide using our third motor to create a tilting motion. A unique healthy position, its cradle-like feeling allows for refreshing circulation, elevating the feet above the heart and the head above the hips. Restful sleep and relief from Edema, Sleep Apnea, and Acid Reflux are among the many benefits our customers tell us they have experienced while enjoying this position. *Available on PR514 & PR405 only.*

The therapeutic **Trendelenburg**, or Lay Flat, position was created to improve circulation in the body. Once in the Zero Gravity position, the power recliner can further elevate the legs and feet above the heart to increase blood flow and release tension from the lower extremities. A body in this position receives an elongation of the lumbar area for a rejuvenating stretch.

TWILIGHT
